DETAILED ACTION

Response to Arguments

Applicant's arguments filed 07 October 2002 have been fully considered but they are not persuasive. In response to applicant's argument based upon the age of the references, the subject matter disclosed in the claims is not disclosed in U.S. Patent 5,957,906, filed 14 November 1997, of which the instant application is a continuation-in-part. U.S. Patent 5,957,906 does not disclose a Waste Contamination Area or a Waste Contamination Mass, and therefore these limitations cannot claim priority to the date of 14 November 1997.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 28-32, 34-37, 40-44, 47-48, and 58-60 are rejected under 35 U.S.C. 102(e) as being anticipated by McIver et al. (6,066,673).

Art Unit: 3761

With respect to claims 28 and 58, McIver discloses a disposable article adapted to be worn by a wearer, as described in the abstract, comprising one or more compositions for enhancing the removability of fecal waste from the skin of a wearer. The one or more compositions are available to at least a portion of one of said fecal waste and said skin of said wearer, and said disposable article is a diaper, as described in column 58, lines 6-9. The one or more compositions provide one or more of the following as determined by the test methods set forth in the instant specification: (a) a Waste Contamination Area of less than about 15 cm²; and (b) a Waste Contamination Mass of less than about 14 mass units, as described in column 75, lines 29-37. McIver discloses, in column 75, lines 29-37, the incorporation of carboxymethyl cellulose into the cover of an absorbent article, which, as disclosed on page 55 of the instant specification, yields the claimed test results. The absorbent article of McIver therefore fulfills all claimed limitations.

With respect to claims 29-32 and 40-42, McIver discloses, in column 75, lines 29-37, the incorporation of carboxymethyl cellulose into the cover of an absorbent article, which, as disclosed on page 55 of the instant specification, yields the claimed test results. The absorbent article of McIver therefore fulfills all claimed limitations.

With respect to claims 43 and 44, McIver discloses, in column 58, line 62 through column 59, line 14, an ionic complexing agent such as zinc oxide.

With respect to claims 34 and 59, McIver discloses, in column 4, line 10 through column 6, line 35, an effective concentration of a feces modifying agent.

Art Unit: 3761

With respect to claims 35-37 and 60, McIver discloses, in column 58, line 25 through column 59, line 39, a skin care composition such as petrolatum.

With respect to claims 47 and 48, McIver discloses, in column 58, lines 25-53 and column 69, line 53 through column 71, line 5, a feces modifying agent disposed on the article as an individual discrete element.
